# Our parcels are in a safe place

Security is important when you receive parcels

That is why our parcel mailboxes have been designed and manufactured in a way that fully meets our requirements for security, even in the choice of materials, construction and location

Our can safely let the parcel mailbox look after your post, from the moment it is delivered until you come home and open your mailbox

Our parcel mailboxes are sturdy, and when they are the proper location about the installation on the wall, they offer all the protection that you need with most parcel mailboxes. You can choose between a twist lock or a security lock

In short, our parcel mailboxes are designed so that it is impossible to retrieve the parcels after they have been deposited

# How much space do you need

Parcel mailboxes are designed for people who receive larger quantities of mail and parcels. Different people have different space requirements.

Therefore, let's choose from a wide range of parcel mailboxes in different sizes. From the smallest box, an extra spacious mailbox with a large slot, to the largest box, a

compact free-standing parcel mailbox holding up to 10 litres. It even has separate slots for mail and parcels.

With its parcel mailboxes, you can receive parcel deliveries several times a day. Whether you are expecting parcels from one or more suppliers, they will always be able to drop off their deliveries.

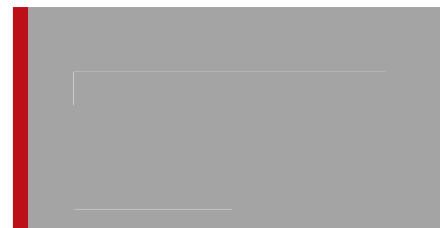

# free standing or on-site on-site

Free standing parcel mailboxes rise out of the ground, lie flat, functional, sculptural, resilient, both powerful and elegant at the same time, with a strong emphasis on space, security and timeless quality – capable of standing tall year after year.

If you prefer a parcel mailbox designed to be on-site, then the on-site mailbox is the product for you. One of the advantages is that you can mount the mailbox on a wall or directly onto a wall, for example.
